### Story Review

I am ready to perform the review. I have internalized the instructions and will apply my 10+ years of experience in healthcare IT, clinical workflows, and regulatory compliance (HIPAA/HL7/PoPIA) to your input.

However, the **Summary** and **Description** fields in your request are currently blank.

**Please provide the User Story you would like me to analyze.**

---

### How I will process your story (Example Analysis)

To demonstrate the depth of my review, here is how I would evaluate a typical healthcare story:

**Example Input Story:**

**Summary:** As a nurse, I want to see a patient's allergy alerts when I scan a medication barcode so I can prevent adverse drug events.\*

**Description:** The system should check the patient's record for allergies and show a warning if there is a match.\*

**My Professional Review:**

| Parameter | Description | Score (out of 20) |

| :--- | :--- | :--- |

| **Clarity** | The intent is clear, but "warning" is ambiguous (is it
